

## DÉPARTEMENT MATHÉMATIQUES ET INFORMATIQUE

Compte rendu :

TP1 FLutter

**Filière :**

**« Ingénierie Informatique : Big Data et Cloud  
Computing »**

**II-BDCC2**

Élaboré par :

**Mohamed Ait Lahcen**

## La page Home:

### ➤ AppDrawer :

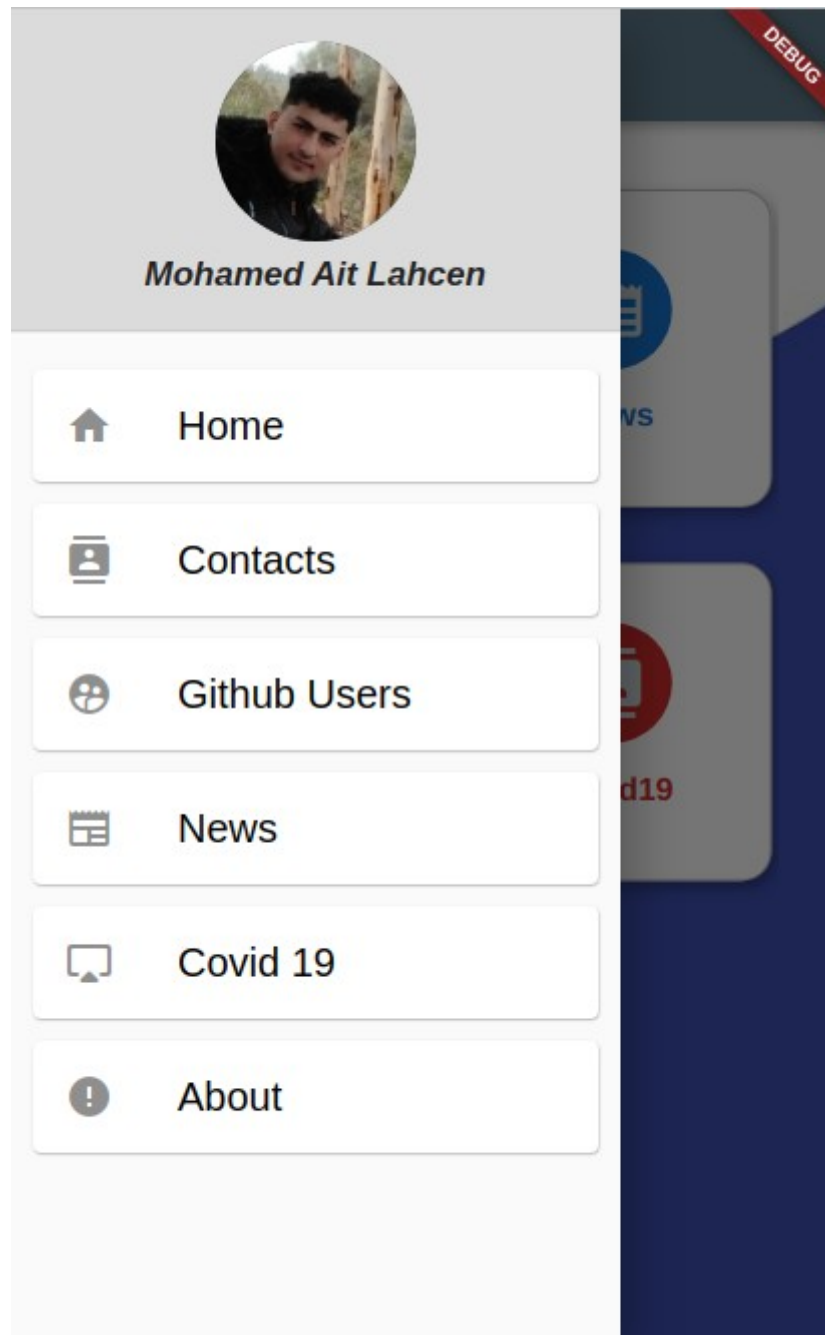

```
class AppDrawer extends StatefulWidget {  
  @override  
  State<AppDrawer> createState() => _AppDrawerState();  
}  
  
class _AppDrawerState extends State<AppDrawer> {  
  @override  
  Widget build(BuildContext context) {  
    return Drawer(  
      child: ListView(  
        children: [  
          DrawerHeader(  
            decoration: BoxDecoration(  
              color: Colors.black12  
            ), // BoxDecoration  
            child: Column(  
              children: [  
                CircleAvatar(  
                  backgroundImage: AssetImage("images/med.jpg"),  
                  radius: 50,  
                ), // CircleAvatar  
                SizedBox(height: 7,),  
                Text("Mohamed Ait Lahcen", style: TextStyle(fontSize: 17, fontStyle: FontStyle.italic, fontWeight: FontWeight.bold),),  
              ],  
            ), // Column, DrawerHeader  
            Padding(padding: EdgeInsets.all(7), child: Column(children: [
```

```
), // CircleAvatar
  SizedBox(height: 7,),
  Text("Mohamed Ait Lahcen", style: TextStyle(fontSize: 17, fontStyle: FontStyle.italic, fontWeight: FontWeight.bold)),
],
)), // Column, DrawerHeader
Padding(padding: EdgeInsets.all(7), child: Column(children: [
  DrawerItem("Home", "/", Icon(Icons.home)),
  SizedBox(height: 3),
  DrawerItem("Contacts", "/contacts", Icon(Icons.contacts)),
  SizedBox(height: 3),
  DrawerItem("Github Users", "/github_users", Icon(Icons.supervised_user_circle)),
  SizedBox(height: 3),
  DrawerItem("News", "/news", Icon(Icons.newspaper)),
  SizedBox(height: 3),
  DrawerItem("Covid 19", "/covidNews", Icon(Icons.airplay_rounded)),
  SizedBox(height: 3),
  DrawerItem("About", "/about", Icon(Icons.error)),
], )), // Column, Padding
],
), // ListView
); // Drawer
}
```

## DrawerItem :

```
class DrawerItem extends StatelessWidget{
  String route;
  String title;
  //BorderRadius bd=BorderRadius.all(Radius.circular(10));
  Icon icon;
  DrawerItem(this.title, this.route, this.icon);
  @override
  Widget build(BuildContext context) {
    return Card(child:
      ListTile(
        focusColor: Colors.white70,
        //shape: RoundedRectangleBorder(side: BorderSide(color: Colors.black12), borderRadius: bd),
        onTap: (){
          Navigator.pushNamed(context, route);
        },
        leading: icon,
        title: Text(
          title,
          style: TextStyle(fontSize: 20, color: Colors.black),
        ), // Text
      ) // ListTile
    ); // Card
  }
}
```

## ➤ Représentation graphique

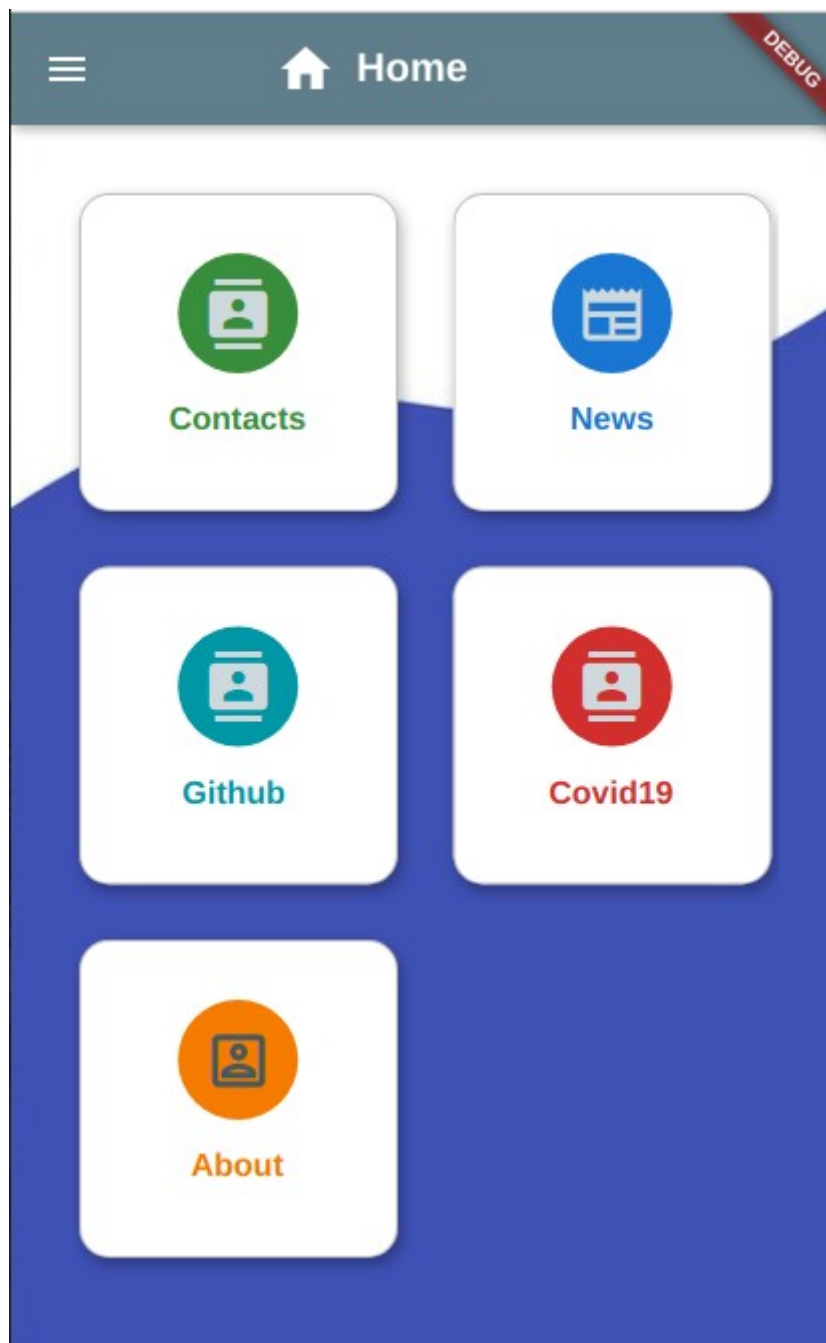

## ➤ Home :

Voici une partie du code de la page home :

```
class Home extends StatelessWidget{
  BorderRadius br=BorderRadius.circular(15);
  @override
  Widget build(BuildContext context) {
    return Scaffold(
      drawer: AppDrawer(),
      appBar: AppBar(
        title: Row(
          children: [
            SizedBox(width: 60,),
            Icon(Icons.home, size: 30),
            SizedBox(width: 10,),
            Text("Home", style: TextStyle(fontWeight: FontWeight.bold), textAlign: TextAlign.center),
          ],
        ) // Row
      ), // AppBar
      body: new Stack(
        children: [
          new Container(
            decoration: new BoxDecoration(
              image: new DecorationImage(image: NetworkImage("https://i.stack.imgur.com/N80YNl.png"), fit: BoxFit.cover),
            ), // BoxDecoration
          ), // Container
          Padding(
            padding: EdgeInsets.all(30),
```

➤ **Représentation graphique :**

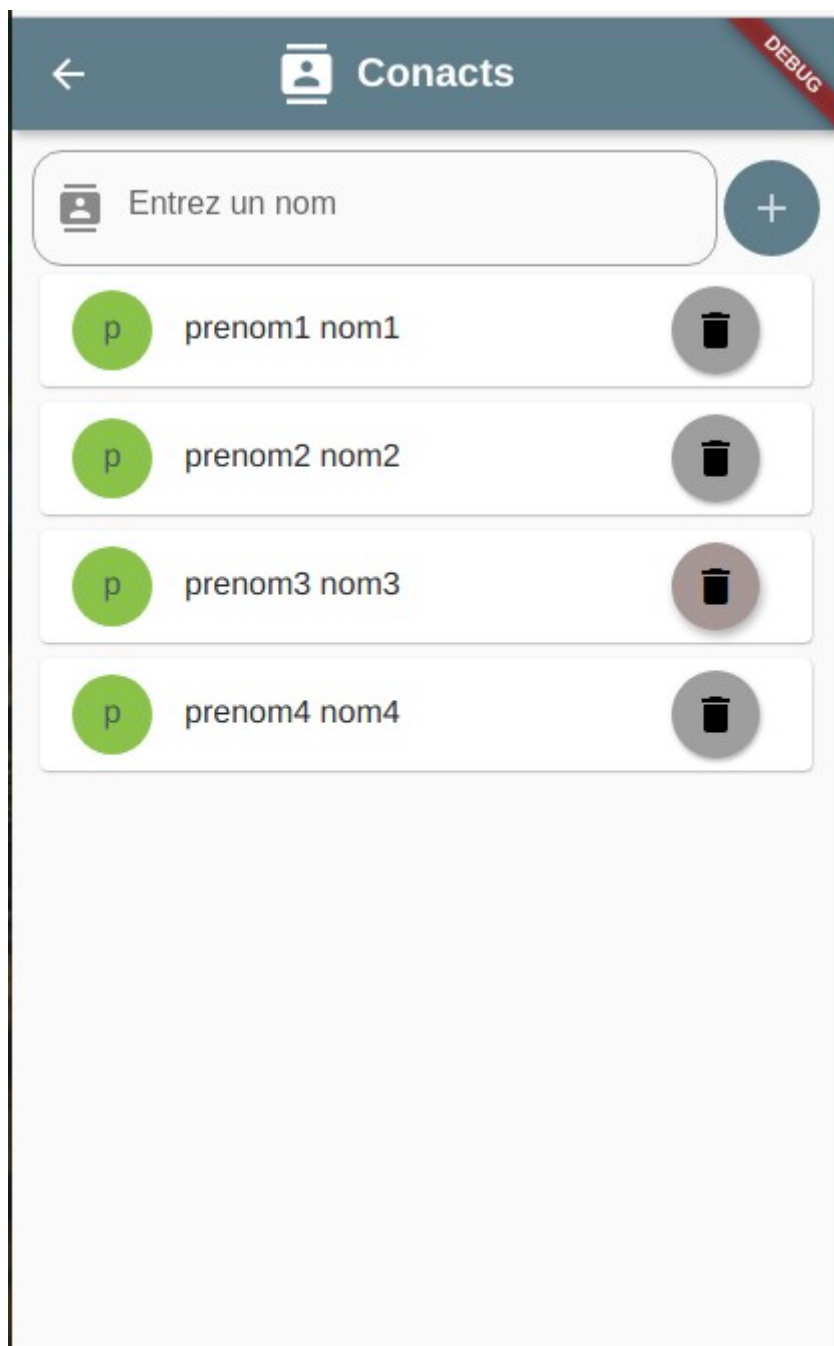

## ➤ La page des contacts :

Dans cette page on affiche les contacts et la champ pour ajouter un nouveau contact :

```
class Contacts extends StatefulWidget {  
  @override  
  State<Contacts> createState() => _ContactsState();  
}  
  
class _ContactsState extends State<Contacts> {  
  TextEditingController textController = new TextEditingController();  
  var borderRadius = const BorderRadius.all(Radius.circular(7));  
  @override  
  Widget build(BuildContext context) {  
    return Scaffold(  
      appBar: AppBar(  
        title: Row(  
          children: [  
            SizedBox(width: 60,),  
            Icon(Icons.contacts,size: 30),  
            SizedBox(width: 10,),  
            Text("Conacts",style: TextStyle(fontWeight: FontWeight.bold),textAlign: TextAlign.center),  
          ],  
        ), // Row  
      ), // AppBar  
      body: Padding(  
        padding: EdgeInsets.all(10),  
        child: Column(  
          children: [  
            Row(  

```

## ➤ Représentation graphique

## La page news :

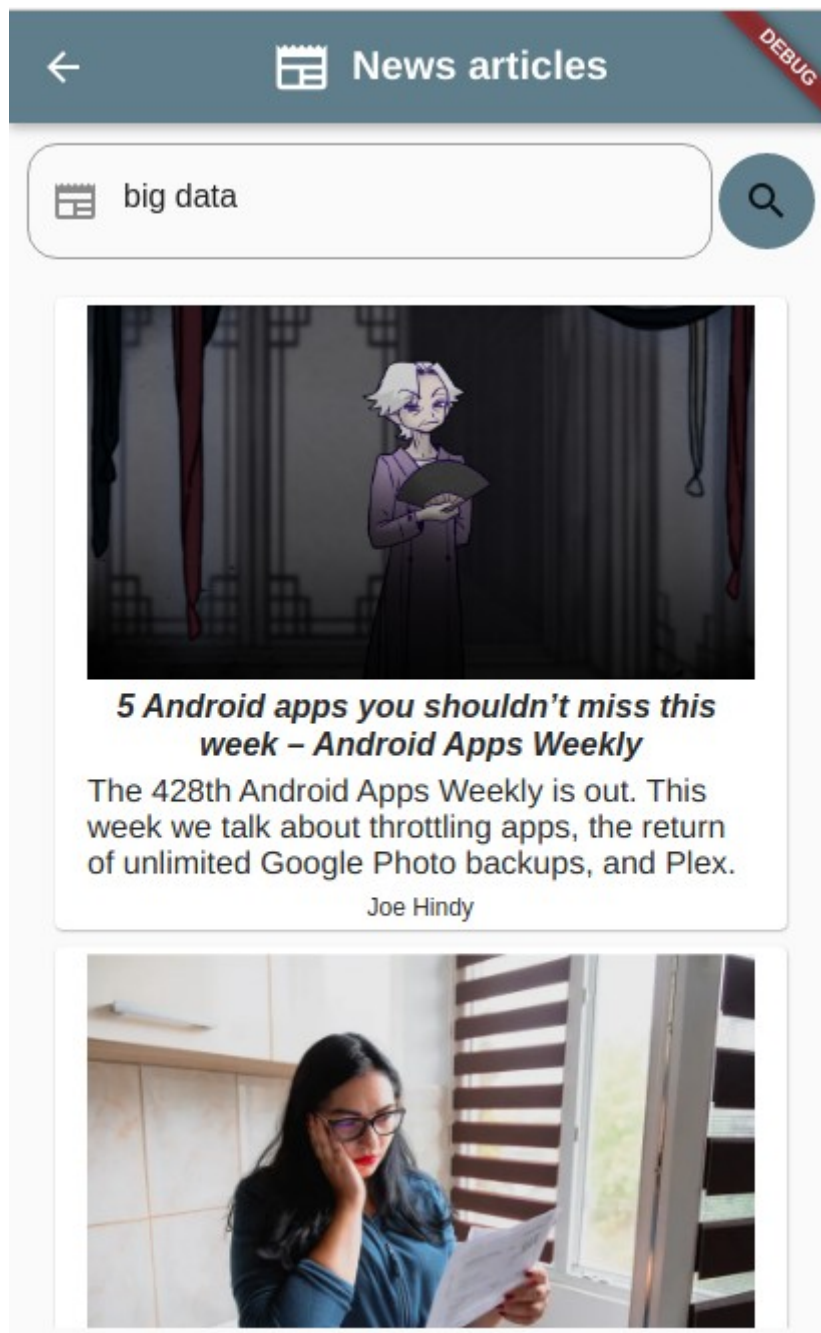

cette permet de chercher les nouvelles :

```
import io.flutter.plugins.httpclient.HttpClient;

class ArticlesApp extends StatefulWidget{
  @override
  State<ArticlesApp> createState() => _ArticlesAppState();
}

class _ArticlesAppState extends State<ArticlesApp> {
  var news=null;
  BorderRadius bd=BorderRadius.all(Radius.circular(10));
  TextEditingController articleController=new TextEditingController();
  String keyApi="78ab7c682a2141aaa6e6791aa13d6ba1";
  void getArticles(String key){
    String url="https://newsapi.org/v2/everything?q=${key}&from=2022-04-02&sortBy=publishedAt&apiKey=${keyApi}";
    http.get(Uri.parse(url)).then((res) {
      setState(() {
        news=json.decode(res.body);
      });
    }).catchError((onError){
      print(onError);
    });
  }
  @override
  Widget build(BuildContext context) {
    return Scaffold(
      appBar: AppBar(
        title: Row(
          children: [
```

## ➤ Représentation graphique

## ➤ La page githubUsers :

cette page permet de chercher dans la liste des utilisateurs qui sont inscrits dans github :

```
class GitHubUsers extends StatefulWidget {  
  @override  
  State<GitHubUsers> createState() => _GitHubUsersState();  
}  
  
class _GitHubUsersState extends State<GitHubUsers> {  
  var users=null;  
  TextEditingController textEditingController=new TextEditingController();  
  
  void searchGithubUser(userKey){  
    String url="https://api.github.com/search/users?q=${userKey}&per_page=10&page=0";  
    http.get(Uri.parse(url))  
      .then((response) {  
        setState(() {  
          users= json.decode(response.body);  
        });  
      }).catchError((onError){  
        print(onError);  
      });  
  }  
  
  @override  
  Widget build(BuildContext context) {  
    return Scaffold(  
      appBar: AppBar(  
        title: Row(  
          children: [  

```

## ➤ Représentation graphique :

## ➤ La page covidStatistics :

cette page permet d'afficher les statistiques de la covid-19 dans un pays donné :

```
class CovidApp extends StatefulWidget{
  @override
  State<CovidApp> createState() => _covidAppState();
}

class _covidAppState extends State<CovidApp> {
  var data=null;
  TextEditingController covidController=new TextEditingController();
  //get statistiques :
  void getData(String country){
    String url="https://covid-api.mmediagroup.fr/v1/cases?country=${country}";
    http.get(Uri.parse(url)).then((res) {
      setState(() {
        data=json.decode(res.body);
      });
    }).catchError((onError){
      print(onError);
    });
  }

  //get flag of country :
  String getFlag(String country){
    String url="https://countryflagsapi.com/png/${country}";
    return url;
  }

  @override
```

## ➤ La page About :

cette page contient mes informations personnelles :

```
class About extends StatelessWidget{
  @override
  Widget build(BuildContext context) {
    return Scaffold(
      appBar: AppBar(
        title: Row(
          children: [
            SizedBox(width: 60,),
            Icon(Icons.account_box_outlined, size: 30),
            SizedBox(width: 10,),
            Text("About", style: TextStyle(fontWeight: FontWeight.bold), textAlign: TextAlign.center),
          ],
        ), // Row
      ), // AppBar
      backgroundColor: Colors.black12,
      body: Padding(
        padding: EdgeInsets.fromLTRB(35, 40, 35, 0),
        child: Center(
          child: Column(
            children: [
              CircleAvatar(
                backgroundColor: Colors.green[700],
                maxRadius: 60,
                backgroundImage: AssetImage("images/med.jpg"),
              ), // CircleAvatar
            ],
          ),
        ),
      ),
    );
  }
}
```
